

DMK

The DMK is a 1U LCD KVM console featuring a retractable 17" LCD panel, keyboard and touchpad. You have the option of choosing between a 1, 8, or 16 port KVM Switch, which allows the IT administrators to manage their entire server room and data center devices easily.

The LCD and keyboard modules slide independently of each other. To maximize space in your data center, the keyboard/touch pad module slides back to "hide away" when not in use, while the thin profile LCD monitor rotates back - flush against the rack - allowing convenient monitoring of computer activity.
