

# NetPAC

The NetPAC is your next-generation portable server for network monitoring, capturing, and analysis. This server has been designed from the ground up to meet the applications' requirements on cooling, massive storage expansion and serviceability. Fully integrated with enterprise class SAS drives and RAID controller with up to 12Gb/s throughput per port, the NetPAC is the most powerful network appliance portable platform. When integrated with high-performance 1GbE, 10GbE, and 20GbE capture cards, it is capable of sustained, multi-gigabit per second recording of network traffic without packet drops.

The NetPAC simply provides an effective and indispensable platform for the manipulation and in-depth analysis of network traffic recording applications.
