

# SMK

The SMK is a 1U single-rail, rackmount monitor drawer with a 17" or 19" LCD, keyboard and touchpad. You have the option of choosing between a 1, 8, or 16 port KVM Switch.

The LCD is built into the cover, and the keyboard and touchpad are built into the base. Setup is fast and easy. Slide the console out; flip the cover up; and you are ready to work. Overall, the SMK simplifies IT duties, and makes installation processes hassle-free.

Occupying a fraction of the space of traditional monitor and keyboard units, the installation of the SMK leaves ample space for other critical components. With built-in analog-to-digital conversion board, the SMK can be connected to any standard VGA graphics card for immediate On Screen Display. The monitor key-board unit has a built-in slide rail and mounts easily onto any 19" rackmount cabinet.
