

# TransPAC

The TransPAC is a new and unique portable platform that was designed for users who needed a truly mobile workstation but cannot give up on the power and expansion capabilities of a standard desktop workstation. It is battery-powered.

While all of our products are portable because of their compact and lightweight design, the TransPAC is fitted with an ocean-server 160W power supply with 4x Li-Ion 95Whr battery packs. This system can operate solely on battery for up to 4 hours or with the supplied charger to allow for continuous usage while charging.

The TransPAC features the latest high-performance, low-wattage Intel i7 Core processor, 4 full-length expansion slots, and up to 20TB of storage. It is simply an exceptional platform for any field applications where an AC power source may not be available.
